

## **The Amman Stock Exchange Holds Training Workshop Titled "Extent of Implementation of Sustainability Standards Among Companies Listed on the First Market" in Collaboration with the UN Global Compact**

May 29, 2025

In line with the Amman Stock Exchange (ASE) continued efforts to strengthen the competitiveness of the national capital market and the companies listed on it, and to implement the best international standards and practices in the market and those related to disclosure and transparency in particular, and as part of the ongoing implementation of a project aimed to raise the awareness among companies listed on the First Market about the concept and importance of sustainability, and requiring them to complete a questionnaire covering the three main pillars of sustainability - environmental, social, and governance (ESG) - starting from the beginning of next year, the (ASE), in

collaboration with the UN Global Compact Network in Jordan, held a training workshop on Wednesday, May 28, 2025.

The workshop targeted representatives of companies listed on the First Market, aiming to familiarize them with basic sustainability concepts and to enable them to assess their level of commitment to applying sustainability standards. The workshop also included practical training on how to fill out the sustainability questionnaire.

It is worth noting that the ASE had previously held an initial training workshop earlier this year for companies listed on the First Market, focusing on the concept of sustainability and its importance in the business world. These workshops are part of a series of initiatives aimed to increase the awareness among listed companies of the importance of disclosing their sustainability practices and enhancing their commitment to related standards.
