

The Adoption of the New Website of the ASE

May 31, 2010

Amman Stock Exchange (ASE) has adopted its new website both in its English and Arabic versions. The New Website reflects the developments witnessed by the ASE. It is based on a dynamic design and an advanced technology. The CEO of the ASE, Jalil Tarif, said that the advanced technology used in the new website provides an easy use for users and investors, in addition to the swift and smooth access to data through advanced search, this method enables the user to search for any data related to the ASE, trading data and companies' information.

Through the new website; users can obtain live trading data, as well as, daily, weekly, monthly and annual bulletins. Moreover, users will be able to customize the trading bulletins for any period they may need, watch the top gainers companies and the top losers live during the trading session, they also can personalize the data by creating their own windows named "My Watch List" by which the user can select a group of companies and watch all data related to them, such as live trading data, bulletins, disclosures and charts, through his/her own window and retrieve such information each time he/she visits the website.

Mr. Tarif added that the user can obtain daily summary either in the form of a table or as a written text. Daily and weekly summaries are updated automatically at the end of the trading session, in order to provide accurate data for all users at the same time. The new website also provides the historical information for main and sub-sectors in the form of tables to enable analysts and researchers to analyze the data as they may need.

Through the new website, Companies' information, bulletins, circulars and disclosures related to listed companies are available since 2001. The website also contains data related to Jordan Capital Market, aspects of investment and milestones. Charts are also developed and reviewed based on historical data and for different periods due to the advanced technology used in designing these charts.

A new feature in the new website named "Stock Screener" has been added. The Stock Screener enables users to filter companies and classify them according to certain criteria. For example, a user can filter companies whose capitals are more or less than a specific level or within a certain range. There are also a number of criteria by which the user can filter companies, such as total assets and price to earnings ratio.

It is worth mentioning that users can go to the old website through a link which was added on the new website's home page, noting that the old website will be canceled one month after launching the new one.
